

Steven Kim

Software Engineer

9223 Oakland Place
Columbia, MD 21046
(443) 472 -1575
sskim14@gmail.com

Active learner and problem solver who started with a career geared towards design and transitioned into software engineering. While approaching the relationship between the front and back end of development, I continue to pursue new skills and experiences in the field by mixing both design and structure.

EXPERIENCE

General Assembly, Washington, D.C. — *Student*

September 2019 - December 2019

Enrolled in a full-time immersive full-stack software development course. The curriculum consisted of a fast-paced, intensive 12-week course to prepare us for professional work by familiarizing us with a plethora of different programming languages and frameworks such as *Javascript*, *ReactJS* and *Python*.

Columbia Signs & Awnings, Jessup, MD — *Sole Proprietor*

August 2017 - September 2019

Maintained business and clientele on a daily basis. Provided accurate drawings for requested designs. Designed advertisements for the business to increase volume of customers.

Signarama, Germantown, MD — *Graphic Designer*

January 2018 - May 2018

Provided assistance while the business adjusted with new management. Designed detailed proofs to submit to the county for permitting. Provided professional mock-ups to present to customers.

EDUCATION

Wilde Lake High School, Columbia, MD — *High School Diploma*

September 2007 - May 2011

Class of 2011
